

“Our vision is to become a major player in the cryptocurrency arena and for MinedBlock to own a significant part of the infrastructure required to process transactions and mint new crypto assets. This will enable our investors to reap a significant return on investment while we employ an aggressive growth strategy to position ourselves as the ‘Amazon’ of the crypto mining industry”

Overview

MinedBlock has added an additional way to interact with our services through the addition of a utility token which will enable a ‘pay as you go’ element to our mining service.

As part of the additional service we will be offering the ability to rent or buy private mining units in our cost effective facilities. Holders will be able to leverage our discount levels with hardware suppliers.

The private hosting service will allocate devices to mine directly to customers own private wallets, with management fees paid for each month in MBTU

True ‘Utility’

The MBTU token is an ERC-20 utility token that has a number of uses:

- It can be used as a payment method to buy MBTX security tokens
- It will be able to be used as payment to buy or rent private mining devices
- To pay for operating costs (hosting, electricity, management)

Token Supply

The total supply of MBTU tokens will be capped at 200,000,000

- IEO – 115,000,000
- Public Airdrop – 10,000,000
- Bounty Campaign – 10,000,000
- Airdrop to MBTX Holders – 30,000,000*
- Team/Reserve – 35,000,000**

Token price will be \$0.10 per MBTU

*MBTU will be airdropped to holders of the first 30m MBTX holders

**Team tokens will be locked for 12 months after IEO ends

Tokenomics

MBTU tokens will be the only way to pay for our private mining services.

Once MBTU is received as payment, we will burn 10% of each transaction, 50% will be sold at market rate, equally, across all listed exchanges to ensure ongoing availability. The other 40% will be retained and distributed as rewards for long term customers.

Reward rates to be revealed

Private Hosted Mining Highlights

- ASIC miners will be dedicated to you and will mine directly to your own wallet
- No maintenance, management or technical requirements
- Grow your portfolio privately without any effort*
- ASIC units can be bought or hired.
- Set up will usually be available within 24 hours**

*Just remember to renew your contract when required

**Waiting list may be in place during peak periods

Service Offering

A selection of mining packages will be available for users to select from with discounts for multiple units

Initially, only ASIC devices will be on offer but we intend to expand the offering to include custom built GPU rigs in the near future

Example:

- Bitmain Antminer S15 – 28T/H
- Available in 1, 3, 6 unit packages with discounts
- Larger deals will be available upon request

****MBTU will only initially be available through an Initial Exchange Offering (IEO) – watch out for the upcoming announcement****
